Reed Weichler

rweichler@gmail.com r333d.com github.com/rweichler twitter.com/rweichler

SKILLS

- Languages: Objective-C, Swift, Lua/LuaJIT, C/C++, JavaScript, Python, Go
- Tools / Software: nginx, OpenResty, PostgreSQL, SQLite, Redis, OpenGL, FreeBSD, Git, Vim, Xcode
- iOS: Core Audio, reverse engineering (IDA disassembler, cycript), runtime modification development, app development, toolchain/framework development, Objective-C runtime, Objective-C / Lua interop, Realm, SQLite, RxSwift

EXPERIENCE

Superhuman

San Francisco

May 2018 - Aug 2019

Software Engineer

• Email client with much of the heavy lifting done on the client-side. Lot of hype in Silicon Valley. Users include Steve Huffman (Reddit), Michael Lopp (Apple/Slack), Nat Friedman (Github), Michael Seibel (ycombinator). It was small/midsize startup. 6 engineers when I joined. I worked with a team of 4 on the iOS app, written in mostly Swift, with some JavaScript/Objective-C/C++. I also added a few patches to the Go backend here and there. Standard run-of-the-mill bug fixes, feature work, and occasional cleanup/refactoring you'd expect at a startup.

Cydia

Indie Developer

Feb 2014 - May 2018

• I made EQE (EqualizerEverywhere) and Cylinder. Search Google for something like "cylinder jailbreak". When jailbreaking was at its peak I had over 2M active users.

I also contributed the developer community such as writing documentation on iphonedevwiki.net, contributing to upstream patches to Cydia Substrate / substitute (used for injecting code into iOS apps / processes), doing research (APT/dpkg clients, Lua/Objective-C interop, SpringBoard alternatives), and helping out on IRC/Discord. If I were to estimate, in total, my products are used by about 20% of active jailbreak users. See install counts here: apt.thebigboss.org/stats.php?dev=rweichler

Quixey

Palo Alto, California

Jan - July 2012

Software Engineer (Intern)

• Low-pressure intro to the industry. Learned about the whole Silicon Valley VC scene, and standard development practices at the time (MongoDB was hyped up during this time).

Cydia Products

- EQE / EqualizerEverywhere: About page: https://eqe.fm/about. Used to be a paid product until Cydia Store shut down in December 2018.
- Cylinder: Source: github.com/rweichler/cylinder Review: youtube.com/watch?v=Y-Pk-XDVj-o

Side Projects

- Lucy: Lua / Objective-C bridge and runtime analysis/debugging tool for iOS. https://github.com/rweichler/lucy
- jjjj: GUI package manager for iOS (based on dpkg, similar to Cydia). https://github.com/rweichler/jjjj
- Aite: Custom build system used to develop software for Cydia. https://github.com/rweichler/aite
- Sunnyveil: 3D game engine written in C and LuaJIT. Has Lua bindings to Bullet (physics engine) and OpenGL.
- Wuigi: Mario clone (kind of like Mario Maker), written in Java. https://github.com/rweichler/wuigi
- Luna Roja: GameBoy emulator designed specifically for Pokémon Red. https://hax.iimarckus.org/topic/7112/

EDUCATION

- Recurse Center: Winter 2, 2020 (Starts January 6, 2020)
- UC Davis: B.S. Computer Science, Class of 2017
- Homestead High School: Cupertino, California
